

# REID MATERIAL LIFT®

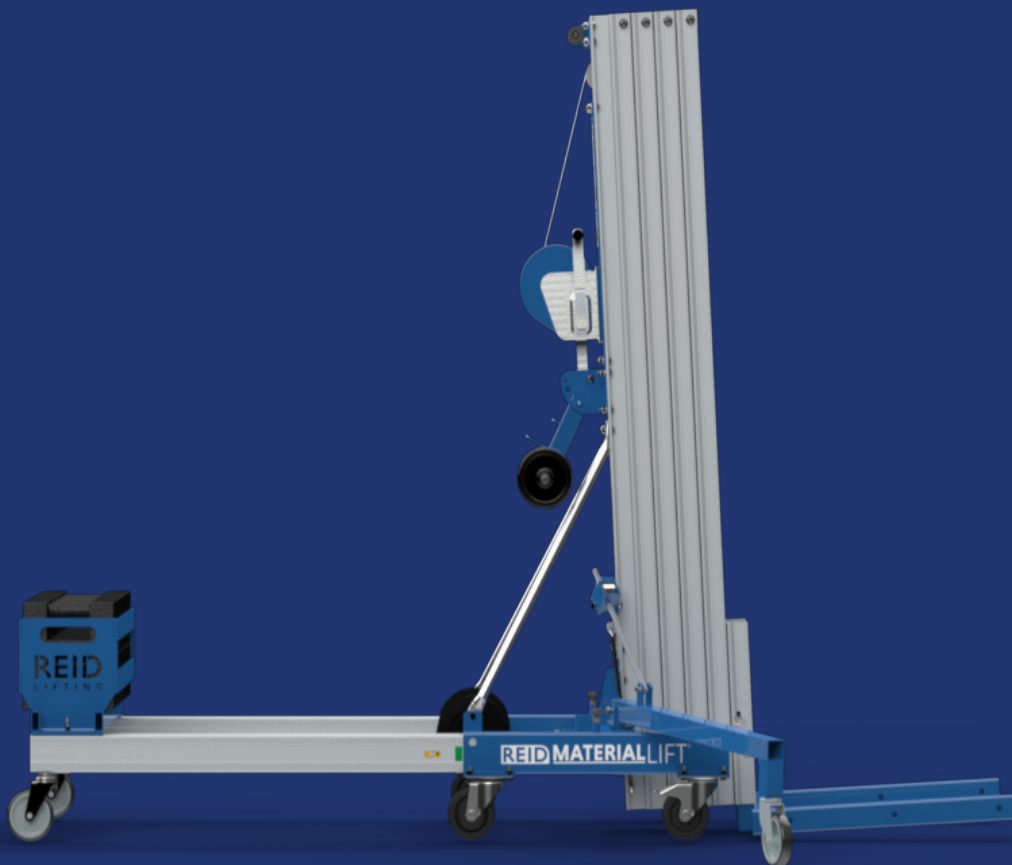

REIDLIFTING.COM

# One system. Two configurations.

Convert in just minutes using a straightforward plunger pin system.

# Introducing the REID Material Lift (RML)

The RML offers two versatile configurations in one, conventional forward facing and counterbalance\*, with the ability to switch between the two, tool free in minutes.

**Not just another material lift, the only material lift you will ever need!**

The RML has many key features designed to increase safety and reliability

**Full set 360° and 2 locking castors** for easier manoeuvrability

**Virtually silent winch** which helps reduce noise emissions

**Easy to transport** as it is equipped with standard horizontal and rough ground transport wheels

**Unique wide rear pulley** which allows even cable feed giving a smoother operation experience

**Quick change rear pulley** helping to minimise downtime

**Hard-wearing alloy pulleys** – standard across the range to increase service life and aid smooth operation

**No ball lock pins** – captive plunger pin set-up system for increased reliability

**Tool free** - Easily converted between configurations without the need for tools

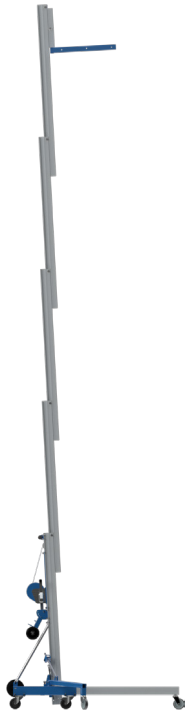

**Anti twist galvanised steel cable** helps maintain the cable and reduce operating costs

# System Options

**RML75**  
300kg Max load  
Added stabiliser legs

**RML60**  
360kg Max load  
Added stabiliser legs

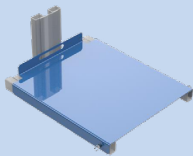

**RML45**  
360kg Max load

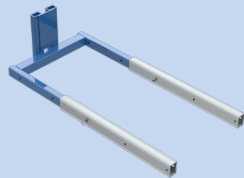

**RML30**  
450kg Max load

## Accessories

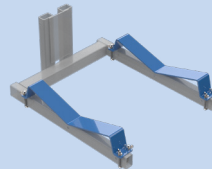

### Load Platform

Allowing items that require additional support to be lifted on a flat platform.

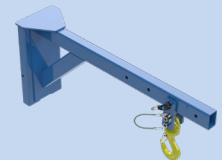

### Fork Extensions

These add support to larger dimension objects

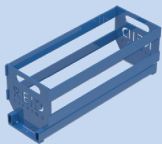

### Pipe Cradle

Ideal for supporting pipes and ducking in M&E applications

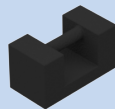

### Boom Arm

Often used for shackle loads or in many cases with the addition of a glass lifting solution.

### Counterbalance Basket

Add to any system to convert to the counterbalance configuration

### 20kg Hand Weight

200kg Required for Counterbalance use
